

**WARREN COUNTY PUBLIC HEALTH
RABIES CLINICS 2009**

Pets must be 3 months of age to receive their first immunization, which will afford them protection for one year. The next shot (booster) will afford protection for 3 years and is required one year after the first shot was given. From then on every three years a booster should be given to protect your pet. Both initial and booster shots will be given at all clinics scheduled by Warren County Public Health.
